

Biotin-X, free acid

Biotin-X free acid (6-((Biotinoyl)amino)hexanoic acid) can be easily converted to the mixed anhydride form, which is more reactive than the succinimidyl ester and thus can be used to react with aromatic amines or sterically hindered amines.

Product attributes

Product Description

Biotin-X free acid (6-((Biotinoyl)amino)hexanoic acid) can be easily converted to the mixed anhydride form, which is more reactive than the succinimidyl ester and thus can be used to react with aromatic amines or sterically hindered amines.

- White solid soluble in DMSO and moderately soluble in DMF
- Store at 4 °C
- C₁₆H₂₇N₃O₄S
- MW: 357.47
- [72040-64-3]
