

3,6-Dioxaoctane-1,8-diyl dimethanesulfonate

3,6-dioxaoctane-1,8-diyl dimethanesulfonate is a water soluble MTS cross-linker.

Product attributes

Excitation/Emission	375/508 nm
---------------------	------------

Product Description

3,6-dioxaoctane-1,8-diyl dimethanesulfonate is a water soluble MTS cross-linker. Stock solutions made in anhydrous DMF are stable for at least two months if stored at -20 °C. However, stock solutions made in water or a buffer should be used immediately.

- Off-white liquid soluble in DMF or water
- Store desiccated at -20 °C
- C₈H₁₈O₆S₄
- MW: 338.49
