Product Description

This kit is designed to perform viability PCR on *E. coli* O157:H7. It contains a viability PCR dye (PMA or PMAxx™) and primers to amplify the Z3276 gene.

About this kit

E. coli O157:H7 is a pathogenic strain of *Escherichia coli* bacteria. Often a food-borne pathogen, it can cause digestive illness. PMA-based viability PCR to detect *E. coli* O157:H7 has been reported using the primers provided in the kit, and ORF Z3276 was shown to be specific for strain O157:H7. These primers have been validated at Biotium for real-time qPCR using Forget-Me-Not™ EvaGreen® qPCR Master Mix. For pan-*E. coli* primers to detect other strains of *E. coli* besides O157:H7, please see kit [31050](#).
